

TETRANIC Website Validation

HTML VALIDATION

(All the warnings are about sections or articles lacking headings but some don't need them or the heading is already placed at another spot on the page. The validator suggested using the div tag instead for this cases but I was trying to avoid using the non-semantic tag.)

Home.html :

The screenshot shows a web browser window with the URL `validator.w3.org/nu/#file`. The page title is "Showing results for home.html". Below the title, there is a "Checker Input" section with options for "Show" (source, outline, image report) and a "Check" button. A message indicates that 7 messages are hidden by filtering. The "Warnings (7)" section contains one warning: "Section lacks heading. Consider using `h2` - `h6` elements to add identifying headings to all sections, or else use a `div` element instead for any cases where no heading is needed. (7)". A green bar at the bottom states "Document checking completed. No errors or warnings to show." and provides execution details: "Used the HTML parser. Total execution time 15 milliseconds."

Artists.html :

The screenshot shows a web browser window with the URL `validator.w3.org/nu/#file`. The page title is "Showing results for artists.html". Below the title, there is a "Checker Input" section with options for "Show" (source, outline, image report) and a "Check" button. A message indicates that 27 messages are hidden by filtering. The "Warnings (27)" section contains two warnings: "Section lacks heading. Consider using `h2` - `h6` elements to add identifying headings to all sections, or else use a `div` element instead for any cases where no heading is needed. (23)" and "Article lacks heading. Consider using `h2` - `h6` elements to add identifying headings to all articles. (4)". A green bar at the bottom states "Document checking completed. No errors or warnings to show." and provides execution details: "Used the HTML parser. Total execution time 26 milliseconds."

Multimedia.html :

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

CSS Validation

Tetranicstyle.css :

The validator sees the `-webkit-` vendor extension as a warning but these lines are needed to stick the navigation bar at the top of the screen when scrolling down and to hide the scrollbar of the image gallery.
